

Your Citizen Voice Greater Pollok

We're making decisions on how the council's Neighbourhood Infrastructure Improvement Fund is spent in your area.

We asked you:

'How should we spend £1 million in Greater Pollok?'

You submitted new ideas and shared what the priorities are for your area.

Some of your ideas didn't fit the Neighbourhood Infrastructure Improvement Fund criteria.

ideas that didn't fit the neighbourhood infrastructure improvement fund such as: ideas for maintenance, ideas that are outside the council boundaries, or ideas in different wards are being shared with the relevant council services to see if we can progress them.

YOUR ideas FOR: IMPROVING STREET LIGHTING

 <p>Put in more street lighting to help kids cross the street and to make it brighter in the night and winter. We have a few parks in our area but the roads are very busy so this could help me. And during dark nights if I'm playing football it would help me see better.</p>	Location No Location	Rejected by Community Empowerment Services, Pre Assessment	Reason This idea is valid but considered too vague to be to passed to the Area Partnership and investigated properly due to lack of precise location. However, similar ideas for light around sports and play facilities are available for voting and being investigated.

	Improving the pavements and access to Priesthill and Darnley Train Station to make it fully accessible to wheelchair users, cyclists, parents with prams, people with poor mobility. In 14 years that I've been living here, there's been no improvement works carried out at the entrance to Priesthill and Darnley Train Station. The pavements and access road are covered with potholes, the paths around it are often overgrown and badly lit. It does not feel safe and is dirty. I feel for anyone who has poor mobility as they could not access it easily. It would be a good opportunity to upgrade as the line is now being electrified. YOUR ideas FOR: IMPROVING OPEN SPACES

 <p>You live in Maidland Road, just look out your window at the uncut grass, the litter, the potholes, not only on the roads but pavements too. The bollards on roads for cycle lanes that are never used, and cause unending traffic jams, get rid of them. It's not rocket science. Cut all the grass regularly like they did in the old days, not just the edges. There is no need to encourage wildlife, we live in an area surrounded by parks, golf courses and fields, where there is more than enough wildlife. We don't need benches when we are living in a toilet.</p>	Location No Location	Rejected by Community Empowerment Services, Pre Assessment	Reason This is a general complaint.

	I understand letting the grass grow to help the environment. However, this can be done in wild flower patches rather than whole roads and streets. My little girl cannot play on the grass without being bit or stung by bugs and nettles. She stands on dog poo due to owners struggling to find the poo between the extremely long grass. A major upgrade of play park at Levernside Road is needed as the park is filled with graffiti, smashed up TVs, and broken play frames. Swings have been removed. The grassy bit on Carnock Road would also be ideal for little park items as it is an upcoming family area. The area would fit a chute, swing, even just the basics would make a huge difference.	Location Braidcraft Road	Rejected by NRS Assessment	Reason The part of the idea referring to Levernside Road Play Area improvements is available for voting. The part of the idea referring to creating a play area on Carnock Road would be located on a road verge which is not safe for play. The rest of the idea refers to general maintenance which is not eligible for this fund. However, all maintenance ideas will be passed to relevant services.

 <p>My idea is to tackle the mental health issues, that is substantially increasing in our younger generations. Its truly heartbreaking. The amount of grief, bereavement & trauma Pollok has endured over many years this has passed over to the kids causing them to have trauma issues at younger ages. I truly believe with a multi use sports hall, with a resilience building trauma informed approach. It is proven that sport & any other physical activity directly tackles and helps reduce mental health issues. With that however the sports hall separate rooms for the resilience building and mental health support will be available. Create a new usable play park as the one on Brockburn Road is neglected and in terrible condition and children need to cross busy road. There is only one baby swing and no older kids swings. We need spaces for kids and parents to enjoy being outside. Look at East End they have terrific park with mud kitchens and climbing toys. It would be good to see some pop up spaces and play equipment for the kids that is sympathetic to the surroundings, perhaps using wood and trees from damshot woods.

Remove Pollok Roundabout and remove bike and bus lanes. Fix the roads. A bus lane on the roads where you are lucky if you have about two or three bus services, is ridiculous. It creates pollution and causes emergency services more hassle to get through. The Pollok roundabout has been unfit for purpose for the last 30 years. The amount of crashes on it this year alone is ridiculous. The roads are unsafe, which is costly for vehicles getting damaged. God knows what it is like on public transport, I'm sure there has been many concessions from hitting potholes and launching off seats, cars can almost take a trip to the centre of the earth. I'm sure we will soon be able to wave to our Australian cousins from each end of the holes.

Your Citizen Voice ? Greater Pollok

The CCI is pioneering a citizen-centred, design-led approach within Glasgow City Council, creating an innovative and consistent model to engage and collaborate with people across the city, developing a joined-up system for people, place and services.

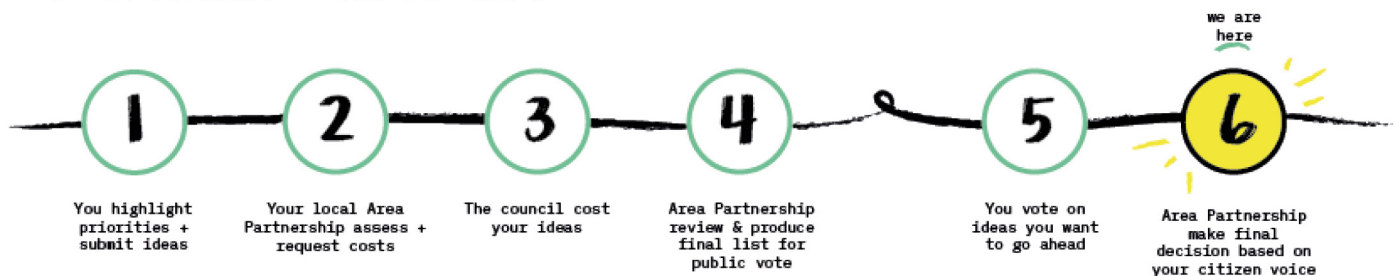

We are co-designing a system which allows Area Partnerships to make decisions based on the opinions of as many local citizens as possible.

We are currently prototyping in two areas of the city, Calton and Greater Pollok, to understand how the system might work across the city.

SO FAR, WE HAVE CO-DESIGNED WITH:
